

Convention: power rails above components; GND below.

The schematic shows the display side of the Volthium board. The central component is the ESP32-S3-WROOM-1-N16R8 microcontroller, which is connected to a PSRAM chip. The microcontroller's pins are connected to various components, including an EPD display (SN65HV03082E), buttons (BTN1, BTN2, BTN3), LEDs (PWR_FLAG), and connectors (J1, J3, J4). Power rails (V3V3, V12_PROT, V12_CATSE) and ground connections are shown throughout the circuit. The schematic is organized into sections, with components labeled with their respective values and part numbers.
